Tool-family contrast cards

soft or deformable tools

Hand auger / drain snake

Supported use: Clears certain drain obstructions at a broad recognition level.

Decisive recognition cues: coiled flexible cable; manual crank or feed housing

Dust mop

Supported use: Collects dry dust and fine debris from floors.

Decisive recognition cues: broad low-profile floor head; dry dusting yarn or pad

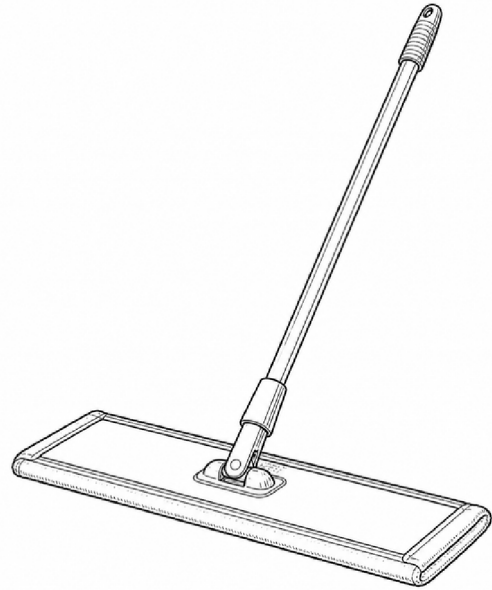

Duster / feather or synthetic duster

Supported use: Removes light dust from surfaces.

Decisive recognition cues: soft feather or synthetic fibers; lightweight handle

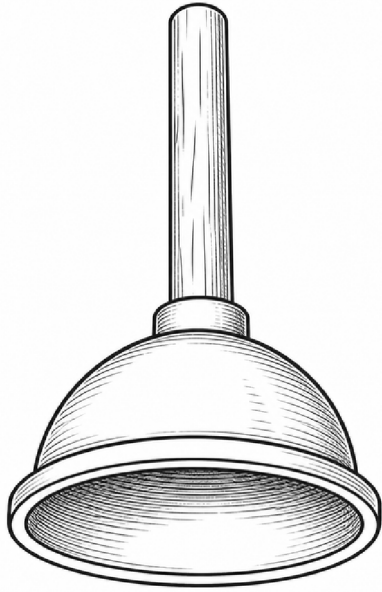

Flat mop

Supported use: Performs damp or wet floor cleaning with the pad system intended for the task.

Decisive recognition cues: low rectangular frame; flat replaceable or reusable pad

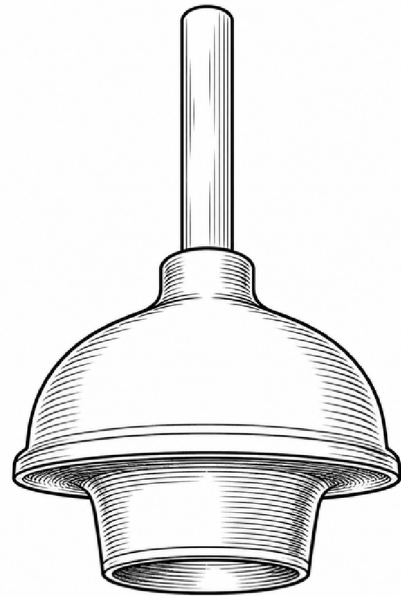

Plunger - cup

Supported use: Clears a suitable flat-drain fixture such as a sink or tub by forming a cup seal.

Decisive recognition cues: plain flexible cup; no extended lower toilet flange

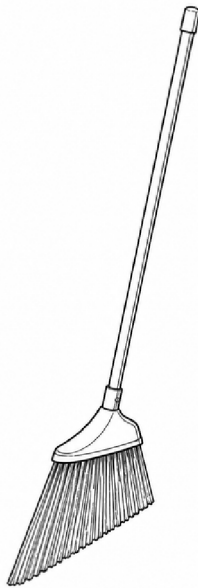

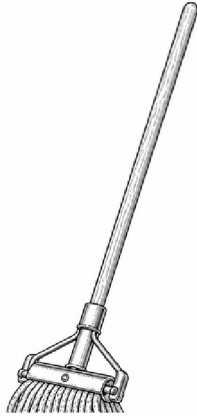

Plunger - flange

Supported use: Plunges a toilet drain with an extended flange designed to seal the outlet.

Decisive recognition cues: flexible cup; extended lower toilet flange

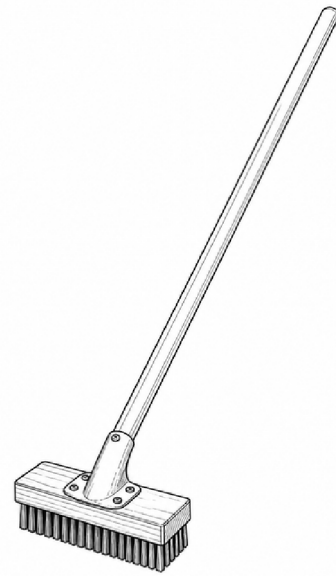

Wet/string mop

Supported use: Sweeps corners and general dry debris.

Decisive recognition cues: angled bristle head; long household-broom handle

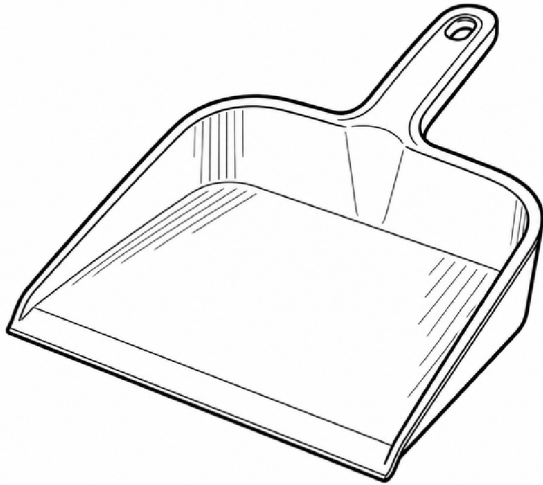

Deck brush

Supported use: Scrubs durable floors or surfaces with a stiff brush head.

Decisive recognition cues: stiff rectangular bristle head; long scrubbing handle

Dustpan

Supported use: Collects debris after it has been swept together.

Decisive recognition cues: shallow collection tray; straight pickup lip

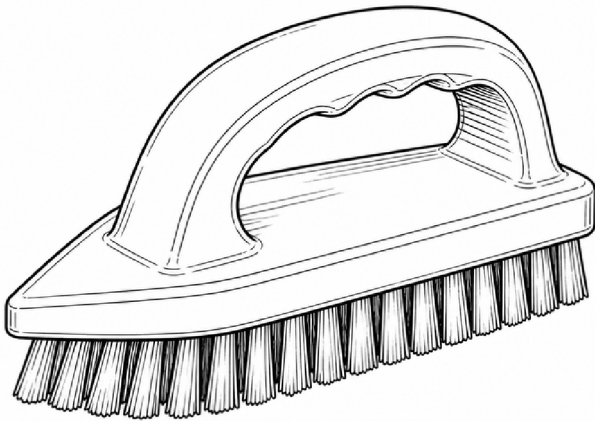

Floor squeegee

Supported use: Moves liquid across a floor with a broad blade.

Decisive recognition cues: long handle; broad floor-width rubber blade

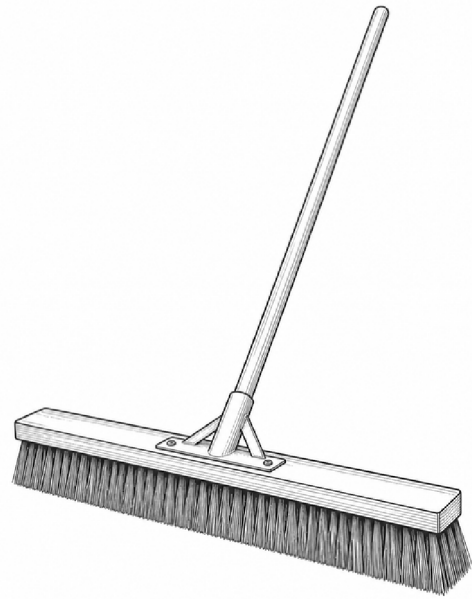

Hand scrub brush

Supported use: Performs manual scrubbing in a compact hand-held form.

Decisive recognition cues: compact hand grip; short dense bristles

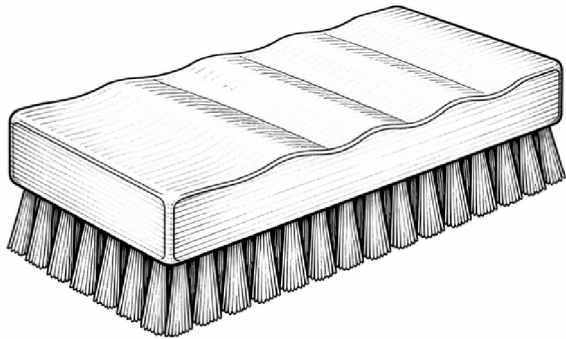

Push broom

Supported use: Sweeps larger floor or area debris with a broad head.

Decisive recognition cues: broad horizontal bristle head; long handle

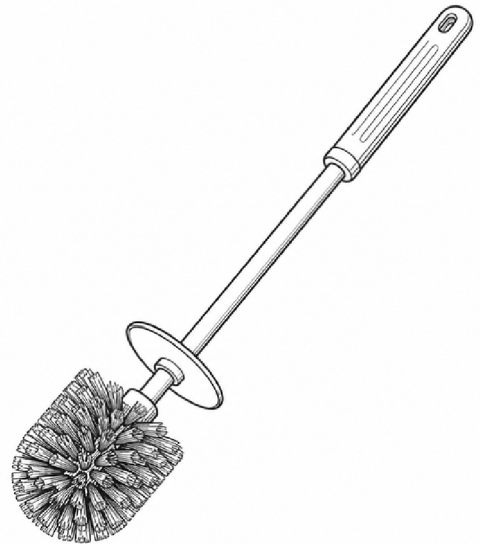

Scrub brush

Supported use: Scrubs or washes an appropriate surface with a bristled working head.

Decisive recognition cues: bristled working head; form intended for manual scrubbing

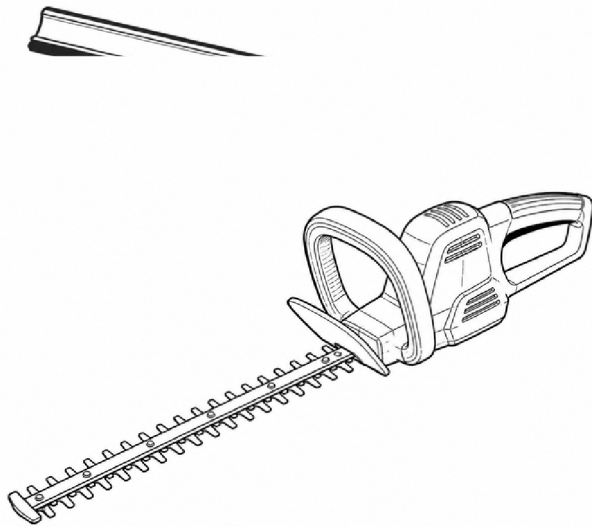

Toilet bowl brush

Supported use: Cleans the interior of a toilet bowl.

Decisive recognition cues: narrow handle; rounded or curved bristle head for bowl access

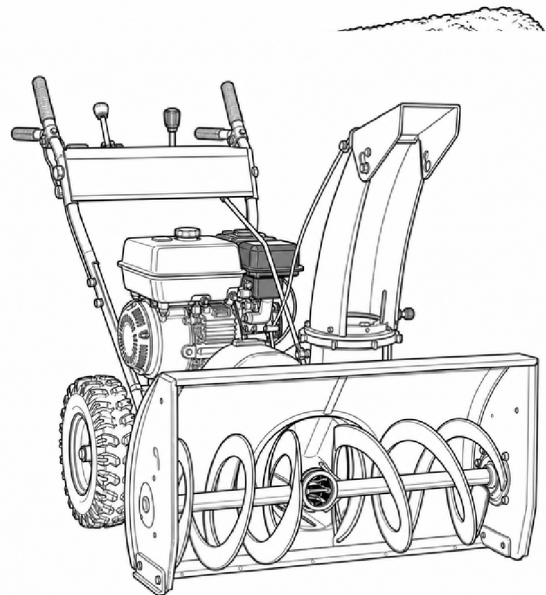

Window squeegee other

Supported use: Trims hedges or shrubs at recognition and basic-safety level only.

Decisive recognition cues: long reciprocating cutting bar; two-hand control form

Window washer / strip washer

removal.

Supported use: Performs mechanized snow removal at recognition and basic-safety level only.

Decisive recognition cues: snow intake housing; discharge chute

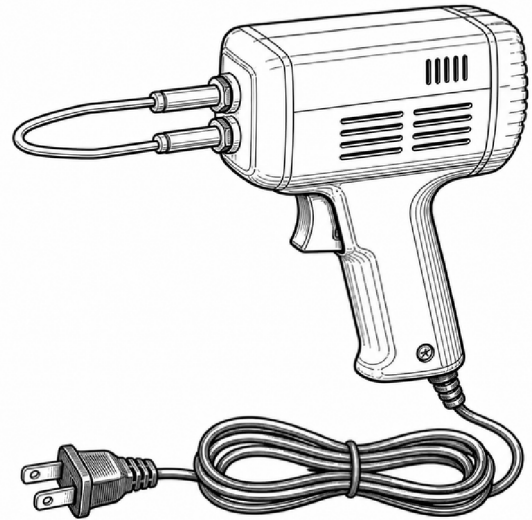

Wet-floor warning sign/cone

Supported use: Warns people and helps control pedestrian exposure to a wet or slippery area.

Decisive recognition cues: high-visibility freestanding sign or cone; wet-floor warning symbol or wording

Soldering gun

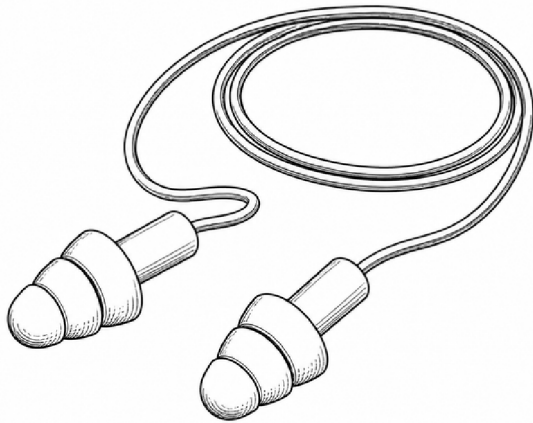

Supported use: Heats a suitable soldering tip for appropriate work, without establishing skilled electrical repair as entry scope.

Decisive recognition cues: pistol-grip body; heated loop or tip at the nose

PPE

Protective ear plugs

Supported use: Provides hearing protection where the exposure and hearing-protection program require it.

Decisive recognition cues: pair of small ear-insert protectors; corded or uncorded form

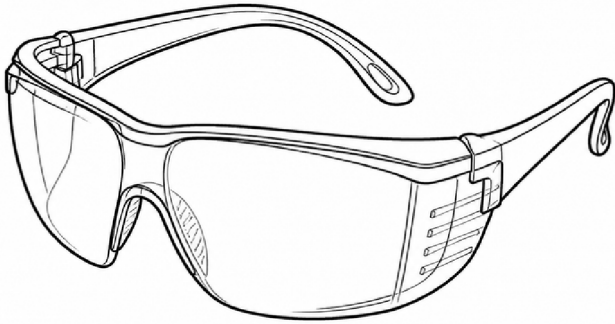

Protective gloves (generic)

Supported use: Provides task-appropriate hand protection selected for the hazard or product.

Decisive recognition cues: paired hand coverings; separate finger shapes

Safety glasses

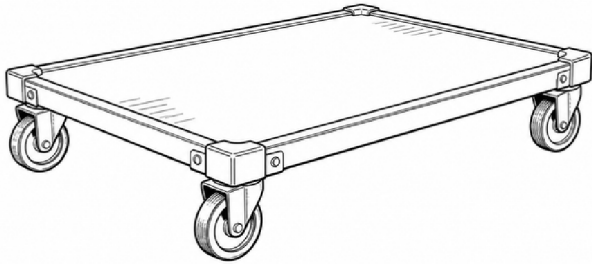

Supported use: Provides eye protection from applicable hazards.

Decisive recognition cues:
transparent protective lenses; side coverage or wraparound eye frame

carts/material-handling equipment

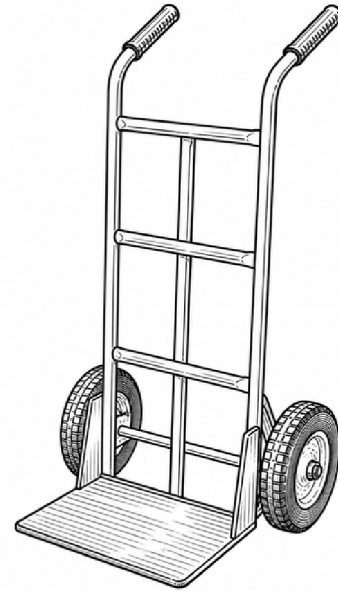

Equipment dolly

Supported use: Moves equipment or loads on a low wheeled platform.

Decisive recognition cues: low load platform; small casters beneath the platform

Hand truck

Supported use: Moves a load supported upright on a two-wheel frame and toe plate.

Decisive recognition cues: upright frame with handles; two wheels and a bottom toe plate

Janitor cart

Supported use: Transports custodial supplies, tools, or waste as its configuration permits.

Decisive recognition cues: wheeled multi-compartment frame; shelves or bag supports

Mop bucket and wringer

Supported use: Holds solution or rinse water and wrings a wet mop.

Decisive recognition cues: bucket basin; integrated wringer press

ladders/access equipment

Extension ladder

Supported use: Provides non-self-supporting access when properly placed and secured.

Decisive recognition cues: overlapping rail sections; non-self-supporting straight form

Stepladder

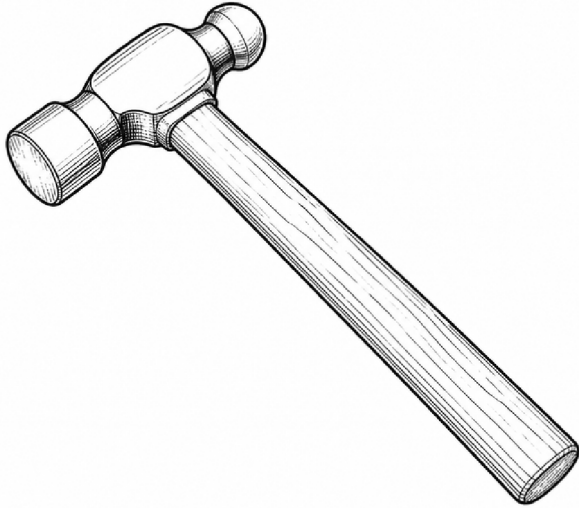

Supported use: Provides self-supporting access at an appropriate height when opened and used as designed.

Decisive recognition cues: self-supporting A-frame; spreaders or bracing between sides

rigid hand tools

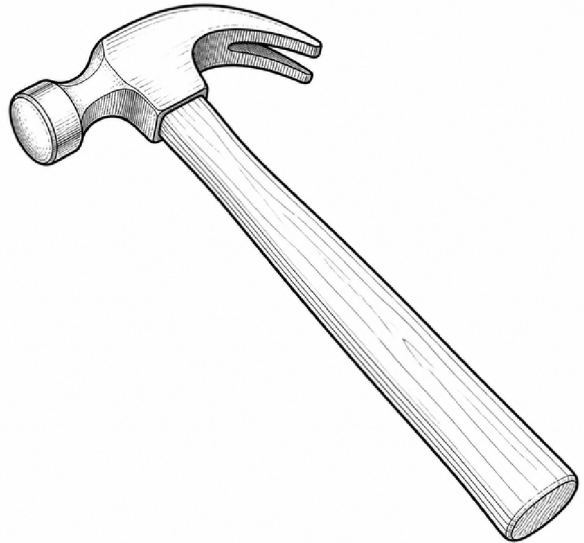

Ball-peen hammer

Supported use: Performs appropriate metalworking or general striking tasks with a rounded peen.

Decisive recognition cues: flat striking face; rounded hemispherical peen

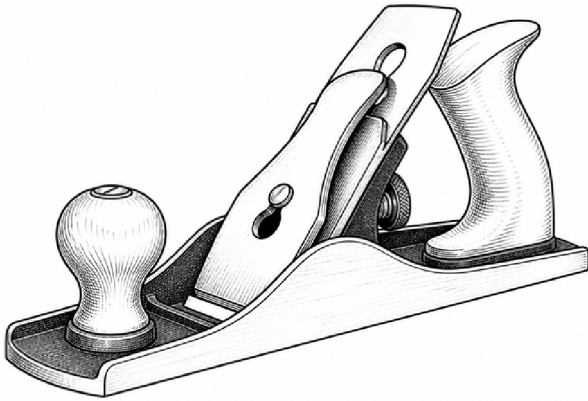

Claw hammer

Supported use: Drives nails and pulls suitable nails with its claw.

Decisive recognition cues: flat striking face; split curved claw

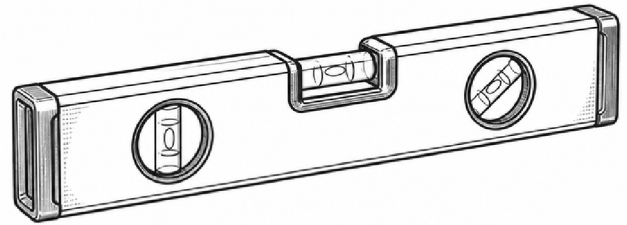

Hand plane

Supported use: Shaves or smooths a wood surface with a cutting iron in a flat sole.

Decisive recognition cues: flat sole; cutting iron projecting through the body

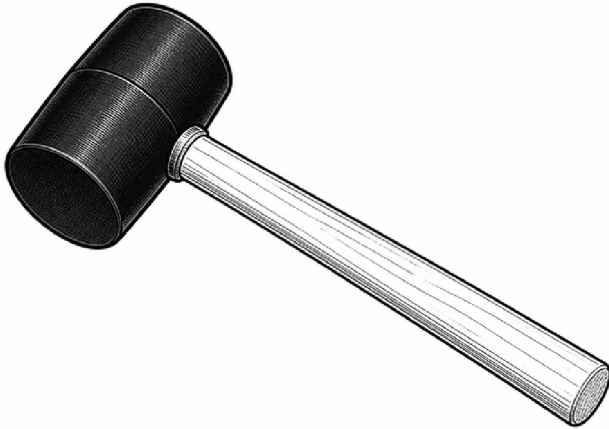

Level

Supported use: Checks whether work is level or plumb.

Decisive recognition cues: straight rigid body; one or more bubble vials

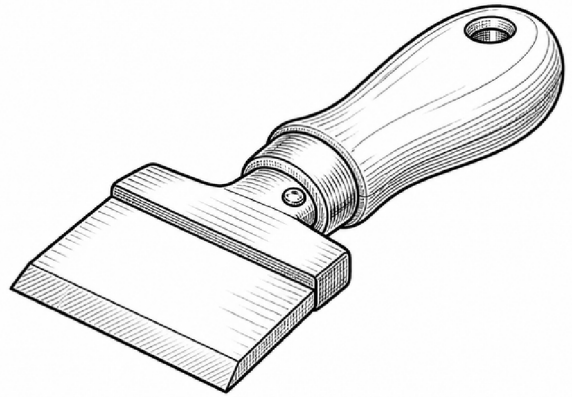

Rubber mallet

Supported use: Strikes suitable work with less surface damage than a metal hammer where appropriate.

Decisive recognition cues: nonmetal cylindrical head; two broad striking faces

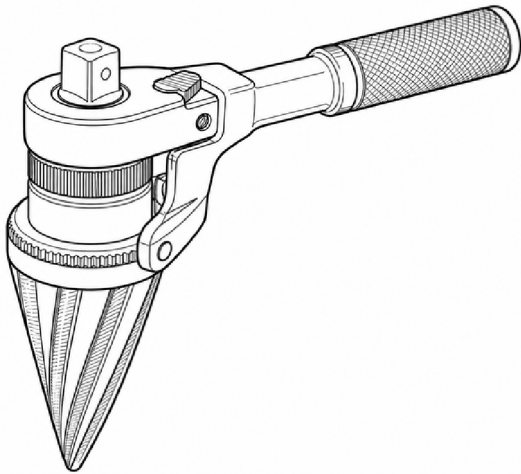

Paint scraper

Supported use: Scrapes paint or residue from a suitable surface.

Decisive recognition cues: scraping blade; handle geometry arranged for scraping force

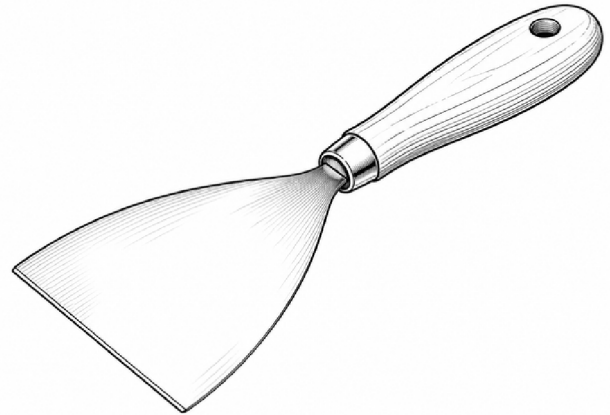

Pipe reamer

Supported use: Removes burrs or reams cut pipe as the tool is designed.

Decisive recognition cues: tapered reaming head; pipe-deburring cutting edges

Putty knife

Supported use: Applies putty or filler and performs suitable light scraping.

Decisive recognition cues: broad flexible spreading blade; straight handle behind the blade

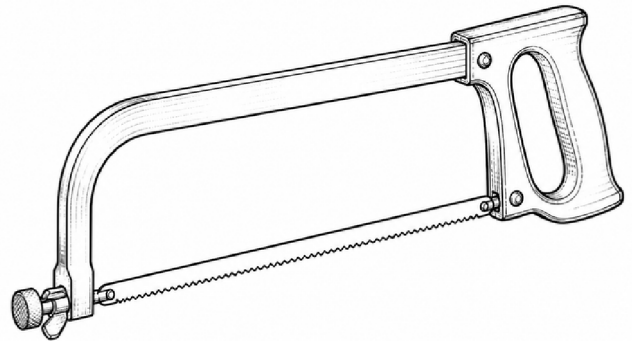

Crosscut saw

Supported use: Cuts across wood grain.

Decisive recognition cues: hand-saw blade; tooth pattern intended for cross-grain cutting

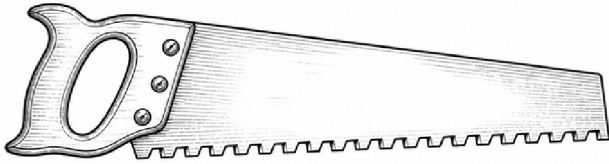

Hacksaw

Supported use: Cuts suitable metal, plastic, or other material as permitted by the fitted blade.

Decisive recognition cues: narrow replaceable blade under tension; open metal frame

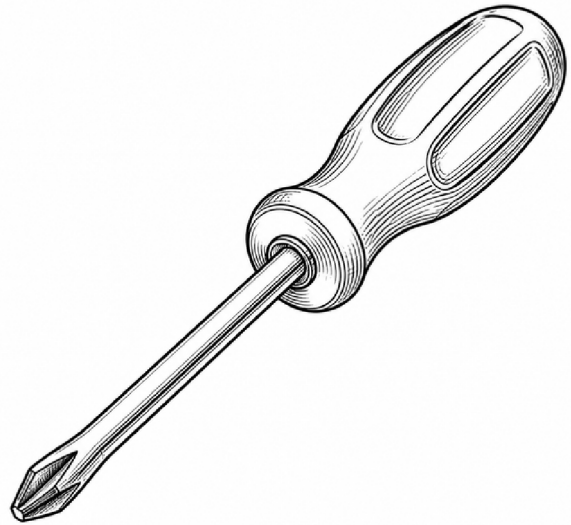

Rip saw

Supported use: Cuts with wood grain.

Decisive recognition cues: hand-saw blade; tooth pattern intended for rip cutting

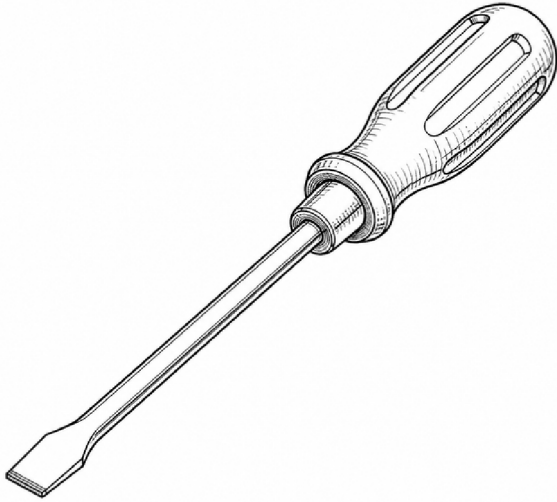

Phillips screwdriver

Supported use: Turns compatible screws with a cross-shaped recess.

Decisive recognition cues: cross-shaped driver tip; four driving flutes

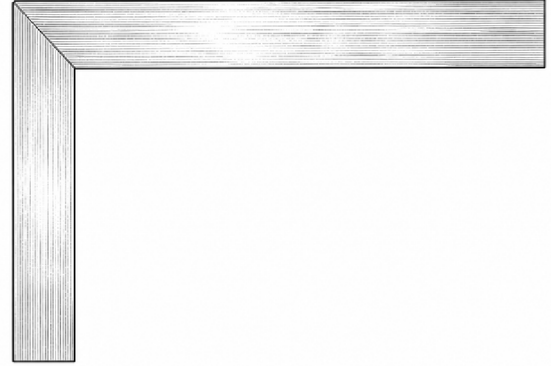

Flat/slotted screwdriver

Supported use: Turns compatible screws with a single straight slot.

Decisive recognition cues: flat blade tip; single straight driving edge

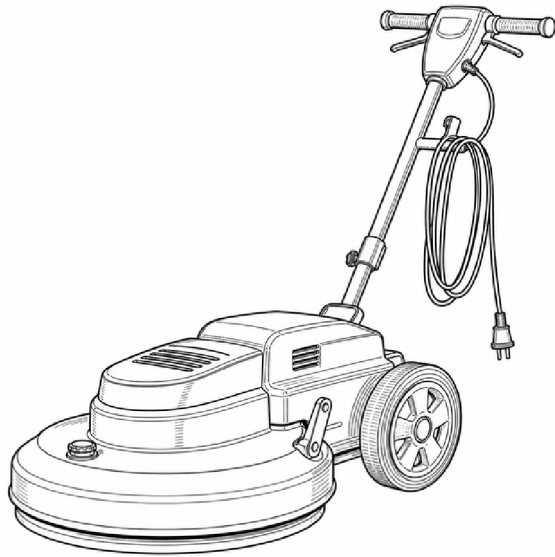

Carpenter square / combination square

Supported use: Checks or marks right angles and related measurements according to the square type.

Decisive recognition cues: right-angle reference surfaces; rigid blade and stock or L-shaped body

Combination/open-end/box powered cleaning equipment

end.

Supported use: Polishes or burnishes compatible finished floors.
Decisive recognition cues: fixed-size opening; open end, box end, or both.

Decisive recognition cues:
representative burnisher chassis; floor-polishing pad housing

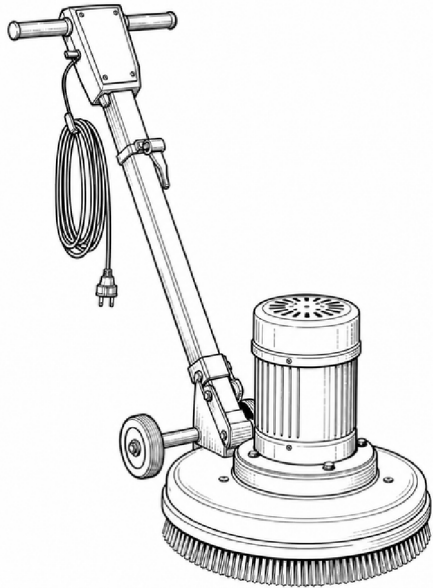

Carpet extractor

Supported use: Applies and recovers cleaning solution during a carpet-cleaning process.

Decisive recognition cues:
representative upright extraction body; solution-recovery floor head

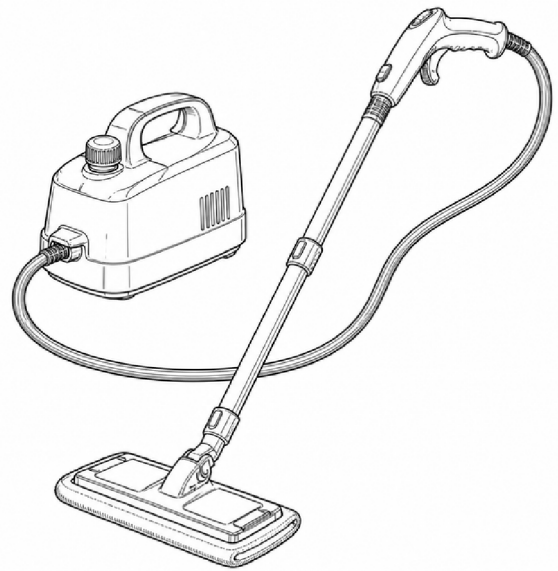

Low-speed rotary floor machine

Supported use: Performs broad floor scrubbing, spray-buffing, or stripping-type tasks depending on the fitted pad or brush and process.

Decisive recognition cues: representative rotary floor-machine chassis; handle controlling a circular pad or brush

Steam-cleaning equipment

Supported use: Performs steam-cleaning tasks according to the equipment instructions.

Decisive recognition cues: steam-producing equipment body; hose or task attachment

Canister vacuum

Supported use: Dry-vacuums with a separate canister connected to a hose and cleaning head.

Decisive recognition cues: separate wheeled canister; hose and wand assembly

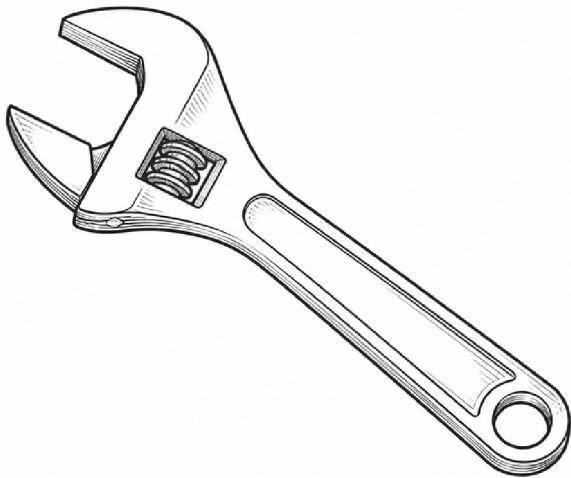

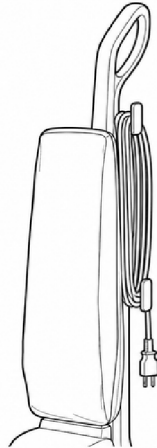

Ride-on industrial vacuum cleaner

Supported use: Vacuums large areas in a ride-on industrial configuration.

Decisive recognition cues: operator seat and controls; large ride-on cleaning chassis

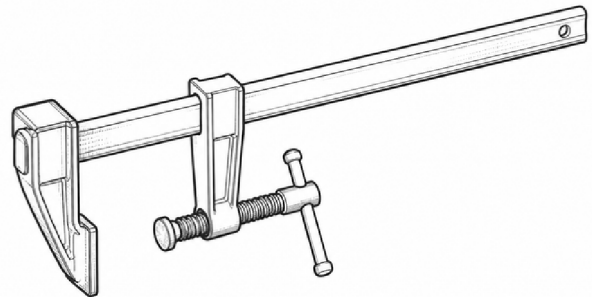

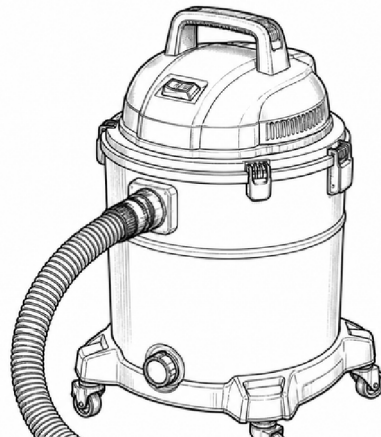

Upright vacuum

Supported use: Turns compatible nuts and bolts with adjustable smooth jaws.

Decisive recognition cues: smooth parallel jaws; visible worm gear for jaw adjustment

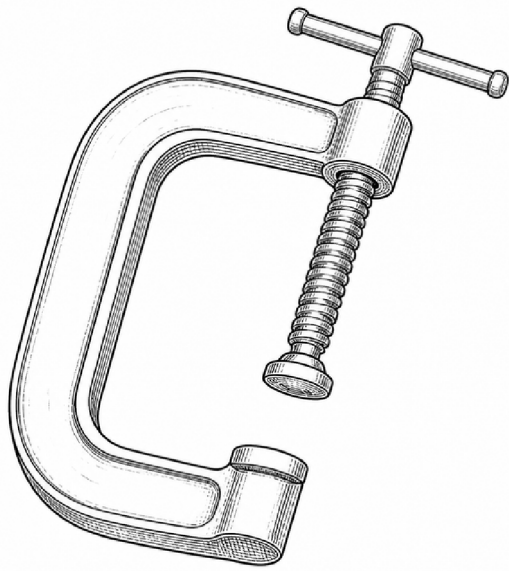

Wet/dry vacuum

Supported use: Clamps wider workpieces with jaws positioned along a bar.

Decisive recognition cues: long straight bar; fixed and sliding jaws

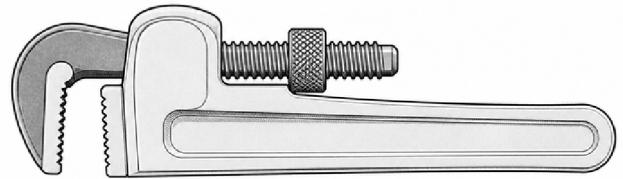

C-clamp

Supported use: Holds workpieces together within the reach of a screw-operated C-shaped frame.

Decisive recognition cues: rigid C-shaped frame; threaded clamping screw

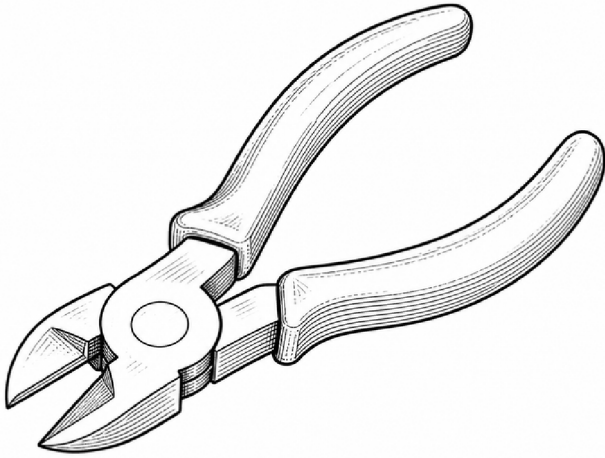

Pipe wrench

Supported use: Grips and turns pipe or round fittings with serrated jaws.

Decisive recognition cues: serrated offset hook and heel jaws; long adjustable body

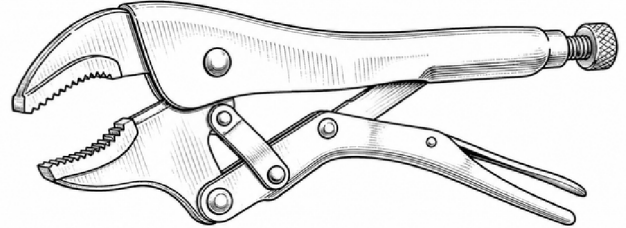

Diagonal cutting pliers

Supported use: Cuts wire or other material within the tool's rating.

Decisive recognition cues: opposed diagonal cutting edges; short cutting jaws

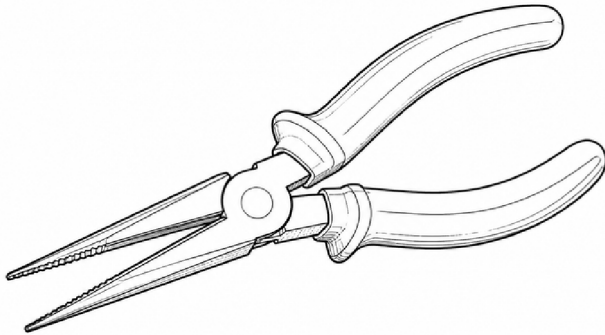

Locking pliers

Supported use: Clamps or grips a workpiece with a locking action.

Decisive recognition cues: locking linkage; handle release lever and adjustment screw

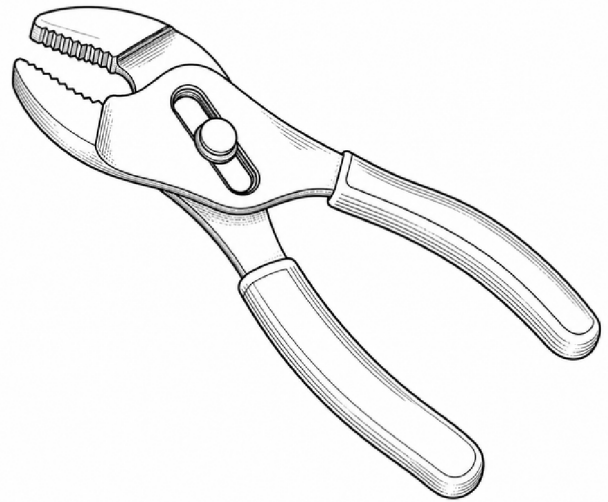

Needle-nose pliers

Supported use: Grips or bends small objects in confined spaces.

Decisive recognition cues: long tapered gripping jaws; narrow pointed nose

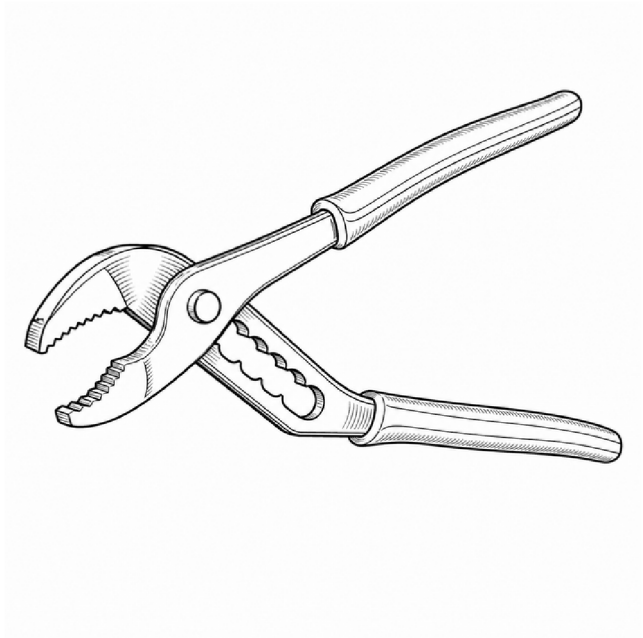

Slip-joint pliers

Supported use: Grips or turns varied objects within the tool's limits.

Decisive recognition cues: two-position sliding pivot; general-purpose gripping jaws

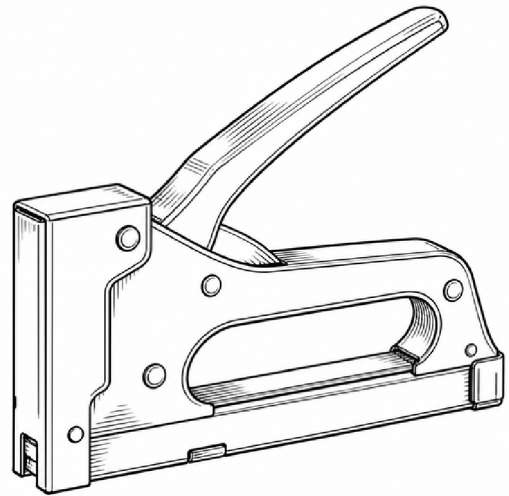

Tongue-and-groove pliers

Supported use: Adjusts through multiple positions to grip larger or irregular objects.

Decisive recognition cues: multi-position tongue-and-groove channel; offset serrated jaws

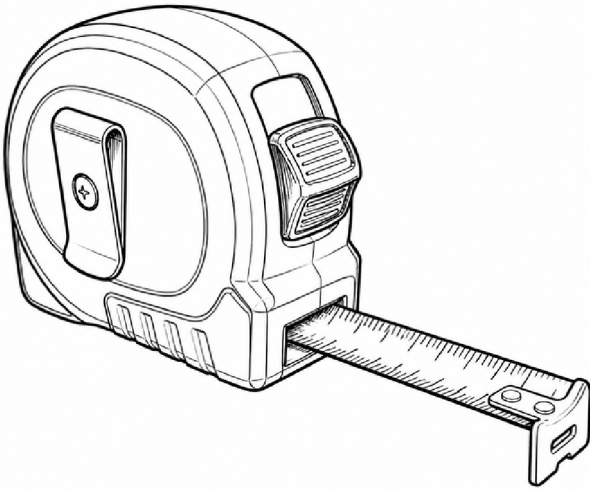

Staple gun

Supported use: Drives staples to fasten suitable materials.

Decisive recognition cues: squeeze lever above the body; staple outlet at the nose

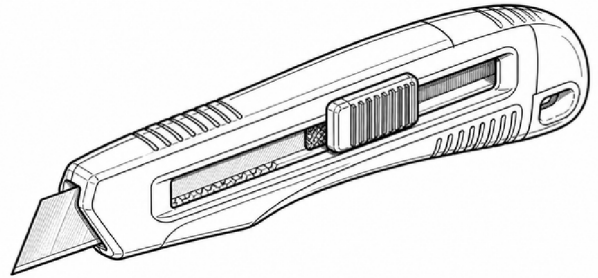

Tape measure

Supported use: Measures length or distance with a marked flexible tape.

Decisive recognition cues: marked flexible tape; retracting case

Utility knife

Supported use: Cuts suitable sheet or other material with a guarded or retractable blade.

Decisive recognition cues: short replaceable blade; handle that guards or retracts the blade
