Questions

1. Which screwdriver turns a compatible screw with a cross-shaped recess?
- A. Phillips screwdriver

B. Utility knife

C. Adjustable wrench

D. Flat/slotted screwdriver
-

2. An adjustable wrench has sprung jaws that slip under load. What should the custodian do?

- A.** Tighten the adjustment harder and continue.
 - B.** Remove the unsafe wrench from use and obtain a serviceable tool.
 - C.** Use it only on smaller fasteners.
 - D.** Add a pipe over the handle for more leverage.
-

3. Which wrench is recognized by a fixed-size open end, box end, or combination of both?

- A.** Combination/open-end/box wrench
 - B.** Tongue-and-groove pliers
 - C.** Adjustable wrench
 - D.** Pipe wrench
-

4. Which striking tool is recognized by a nonmetal cylindrical head with two broad faces?

- A.** Claw hammer
 - B.** Ball-peen hammer
 - C.** Rubber mallet
 - D.** Staple gun
-

5. Before using a portable ladder, a custodian finds a cracked rail. What is the safest next step?

- A.** Remove it from service and tag it until repaired or discarded.
 - B.** Use it only for a task below shoulder height.
 - C.** Cover the crack and finish the shift.
 - D.** Ask a coworker to hold the cracked rail.
-

6. Which screwdriver is recognized by a flat blade tip with one straight driving edge?

- A.** Putty knife
 - B.** Phillips screwdriver
 - C.** Utility knife
 - D.** Flat/slotted screwdriver
-

7. Which vacuum is recognized by a separate wheeled canister with a hose and wand assembly?

- A.** Wet/dry vacuum
 - B.** Canister vacuum
 - C.** Steam-cleaning equipment
 - D.** Janitor cart
-

8. In the accepted wrench comparison, which tool has serrated offset hook-and-heel jaws rather than smooth parallel jaws and a worm gear?

- A.** Pipe wrench
 - B.** Adjustable wrench
-

9. Supplies are stacked around the foot of a ladder needed for a task. What should happen before climbing?

- A.** Move only the tallest item and leave the rest in place.
 - B.** Clear the area around the ladder's top and bottom.
 - C.** Ask a coworker to warn people about the supplies.
 - D.** Step over the supplies while keeping one hand on the rail.
-

10. Which hammer both drives nails and pulls suitable nails with a claw?

- A.** Ball-peen hammer
 - B.** Rubber mallet
 - C.** Staple gun
 - D.** Claw hammer
-

11. Which PPE provides hearing protection where the exposure and program require it?

- A.** Protective ear plugs
 - B.** Wet-floor warning sign/cone
 - C.** Protective gloves (generic)
 - D.** Safety glasses
-

12. Which equipment holds solution or rinse water and provides a wringer for a wet mop?

- A.** Dustpan
 - B.** Mop bucket and wringer
 - C.** Equipment dolly
 - D.** Janitor cart
-

13. Which hand tool cuts suitable sheet material with a short guarded or retractable blade?

- A.** Putty knife
 - B.** Hacksaw
 - C.** Paint scraper
 - D.** Utility knife
-

14. Which tool is recognized by a compact hand grip over short dense bristles?

- A.** Hand scrub brush
 - B.** Push broom
 - C.** Window washer / strip washer
 - D.** Deck brush
-

15. Which tool applies and agitates window-cleaning solution before the liquid is removed?

- A.** Floor squeegee
 - B.** Duster / feather or synthetic duster
 - C.** Window washer / strip washer
 - D.** Window squeegee
-

16. A maintenance task can send small particles sideways through the air. Which eye protection feature is required by the cited rule?

- A.** Protection that includes side protection for the flying-object hazard.
 - B.** Clear front lenses with open sides.
 - C.** Ordinary eyewear worn beneath a face covering.
 - D.** Dark lenses without regard to side coverage.
-

17. Which tool collects debris after it has been swept together?

- A.** Mop bucket and wringer
 - B.** Duster / feather or synthetic duster
 - C.** Floor squeegee
 - D.** Dustpan
-

18. Which tool removes liquid from glass or a window surface?

- A.** Duster / feather or synthetic duster
 - B.** Floor squeegee
 - C.** Window washer / strip washer
 - D.** Window squeegee
-

19. Which equipment is recognized by an upright handled frame, two wheels, and a bottom toe plate?
- A.** Stepladder
 - B.** Hand truck
 - C.** Equipment dolly
 - D.** Janitor cart
-

20. Which tool is recognized by a straight rigid body containing one or more bubble vials?
- A.** Carpenter square / combination square
 - B.** Combination/open-end/box wrench
 - C.** Level
 - D.** Tape measure
-

21. Which tool is intended specifically for cleaning the interior of a toilet bowl?
- A.** Duster / feather or synthetic duster
 - B.** Toilet bowl brush
 - C.** Hand scrub brush
 - D.** Window washer / strip washer
-

22. Which tool is recognized by a short replaceable blade that retracts into or is guarded by its handle?
- A.** Putty knife
 - B.** Flat/slotted screwdriver
 - C.** Utility knife
 - D.** Paint scraper
-

23. Which tool uses a bristled head to scrub or wash an appropriate surface?

- A.** Staple gun
 - B.** Scrub brush
 - C.** Protective gloves (generic)
 - D.** Dustpan
-

24. Which tool holds workpieces within a rigid C-shaped frame by tightening a screw?

- A.** Locking pliers
 - B.** Hand plane
 - C.** C-clamp
 - D.** Staple gun
-

25. Which tool is recognized by rigid reference surfaces arranged to establish a right angle?

- A.** Combination/open-end/box wrench
 - B.** Tape measure
 - C.** Level
 - D.** Carpenter square / combination square
-

26. In the accepted hammer comparison, which tool has a rounded hemispherical peen rather than a split claw?

- A.** Ball-peen hammer
 - B.** Claw hammer
-

27. Which equipment is recognized by a wheeled multi-compartment frame with shelves or bag supports?

- A.** Equipment dolly
 - B.** Hand truck
 - C.** Mop bucket and wringer
 - D.** Janitor cart
-

28. Which tool is recognized by a narrow handle and a bristle head shaped for bowl access?

- A.** Hand scrub brush
 - B.** Duster / feather or synthetic duster
 - C.** Dustpan
 - D.** Toilet bowl brush
-

29. A custodian must climb a portable ladder. Which climbing method follows the cited safety guidance?

- A.** Keep two hands and one foot, or two feet and one hand, in contact.
 - B.** Hold one side rail with one hand and keep both feet moving.
 - C.** Carry supplies in both hands while climbing slowly.
 - D.** Climb without hand contact if another worker watches.
-

30. Which screwdriver is recognized by a cross-shaped tip with four driving flutes?

- A.** Utility knife
 - B.** Flat/slotted screwdriver
 - C.** Putty knife
 - D.** Phillips screwdriver
-

31. Which equipment is recognized by a low load platform carried on small casters?

- A.** Hand truck
 - B.** Equipment dolly
 - C.** Janitor cart
 - D.** Stepladder
-

32. Which striking tool is chosen when a nonmetal head can reduce surface damage compared with a metal hammer?
- A.** Rubber mallet
 - B.** Claw hammer
 - C.** Ball-peen hammer
 - D.** Hand plane
-
33. Which PPE is recognized as a pair of small corded or uncorded ear-insert protectors?
- A.** Safety glasses
 - B.** Wet-floor warning sign/cone
 - C.** Protective gloves (generic)
 - D.** Protective ear plugs
-
34. Which tool applies or picks up liquid during appropriate wet floor cleaning?
- A.** Duster / feather or synthetic duster
 - B.** Wet/string mop
 - C.** Dust mop
 - D.** Push broom
-
35. Which item provides task-appropriate hand protection selected for the hazard or product?
- A.** Protective ear plugs
 - B.** Safety glasses
 - C.** Wet-floor warning sign/cone
 - D.** Protective gloves (generic)
-
36. In the accepted squeegee comparison, which tool has the long handle and broad floor-width head?
- A.** Window squeegee
 - B.** Floor squeegee
-

37. Which vacuum is recognized by a tank-style body and flexible suction hose?

- A.** Canister vacuum
 - B.** Janitor cart
 - C.** Wet/dry vacuum
 - D.** Steam-cleaning equipment
-

38. Which tool is intended to scrape paint or residue from a suitable surface?

- A.** Putty knife
 - B.** Hand plane
 - C.** Utility knife
 - D.** Paint scraper
-

39. Which hand tool shaves or smooths a wood surface with a cutting iron?

- A.** Hacksaw
 - B.** Paint scraper
 - C.** Hand plane
 - D.** Staple gun
-

40. In the accepted three-tool clamping comparison, which tool has fixed and sliding jaws positioned along a long straight bar?

- A.** Locking pliers
 - B.** C-clamp
 - C.** Bar clamp
-

41. Which item warns people and helps control pedestrian exposure to a wet or slippery area?

- A.** Floor squeegee
 - B.** Wet-floor warning sign/cone
 - C.** Protective gloves (generic)
 - D.** Safety glasses
-

42. Which type of general-purpose pliers grips or turns varied objects using a two-position pivot?

- A.** Needle-nose pliers
 - B.** Diagonal cutting pliers
 - C.** Tongue-and-groove pliers
 - D.** Slip-joint pliers
-

43. While climbing, where should a worker face and position their body?

- A.** Turn sideways and keep weight over one rail.
 - B.** Face away from the ladder and lean toward the work.
 - C.** Face either way as long as both feet touch a step.
 - D.** Face the ladder and stay near the middle of the step.
-

44. Which tool checks or marks a right angle?

- A.** Tape measure
 - B.** Carpenter square / combination square
 - C.** Combination/open-end/box wrench
 - D.** Level
-

45. Which saw cuts suitable metal or plastic when fitted with the appropriate blade?

- A.** Hand plane
 - B.** Utility knife
 - C.** Hacksaw
 - D.** Paint scraper
-
